AI Interview Performance Report

Final Score: 0/10

Confidence: 0/10

Communication: 0/10

Correctness: 0/10

Professional Advice

Significant improvement required. Focus on structured thinking, clarity, and confident delivery. Practice answering aloud regularly.

#	Question	Score	Feedback
1	What steps would you take to ensure your RESTful API is user-friendly and meets customer requirements?	1/10	What was good: The attempt to answer the question. What to fix: The answer is unclear and does not provide any relevant information. Better way to say it: I would follow best practices like clear naming, proper documentation, and validation to make the API user-friendly.
2	How would you approach debugging a backend application that is not responding as expected?	1/10	What was good: The answer shows some effort. What to fix: The response is unclear and does not use any proper vocabulary. It needs to be structured. Better way to say it: I would check the logs for errors, test different parts of the application, and look for any code issues that may cause problems.
3	Can you discuss your understanding of data storage options and how you would choose one for a project?	0/10	You did not submit an answer. Let's move on to the next question.

#	Question	Score	Feedback
4	What tools or practices would you use to ensure the reliability of your backend services during development?	0/10	You did not submit an answer. Let's move on to the next question.
5	In your opinion, how important is documentation for backend code, and what aspects should it cover?	0/10	You did not submit an answer. Let's move on to the next question.
6	How do you prioritize tasks when developing backend features to balance quality and deadlines?	0/10	You did not submit an answer. Let's move on to the next question.
